

Cubic ODE parameter sweep (equilibria shown)

Method comparison for $q = 10.0$

Method comparison for $q = 0.1$

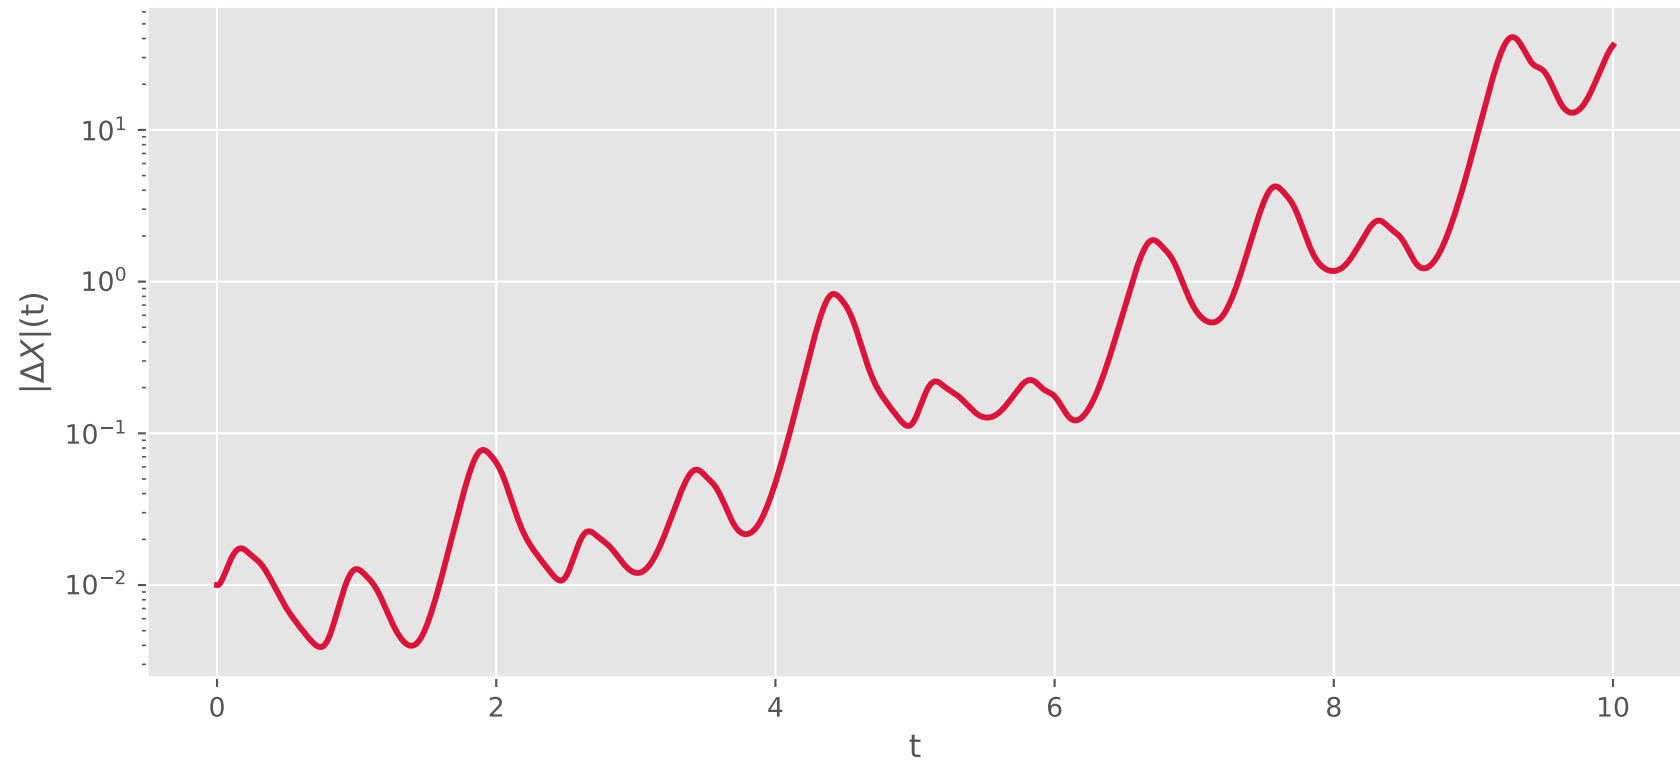

Lorenz sensitivity to perturbing $x_2(0)$

— Baseline — $x_2(0) = 5.01$ perturbed

Lorenz trajectory separation

Logistic ODE comparison (q=0.1)

Logistic ODE comparison (q=1.0)

Convergence study (log-log)

Forced Lorenz trajectories
